

Michigan Veterinary Specialists
Outpatient Ultrasound Information

You are being referred to us by your primary veterinarian so that we can provide him/her with detailed ultrasound to better help diagnose your pet's illness.

What to Expect

Your pet will have an ultrasound performed by a board certified radiologist. To adequately obtain the best quality images, the fur will be shaved from the body part to be imaged. We strive to shave as little as possible.

Results

Our radiologist will provide a report to your veterinarian following the appointment. Because your primary veterinarian knows your pet's history and current condition, he/she will be better able to report the ultrasound findings and manage your pet's care. If you have any questions about the ultrasound results, please consult your primary veterinarian.

Thank you for choosing MVS to help address your pet's condition.
